EDUCATION

Lovely Professional University, Phagwara, Punjab – *B.Tech, Computer Science & Engineering* | *CGPA: 8.1* Aug 2022 – Present

Relevant Coursework: Statistics & Probability, Database Management Systems, Data Structures & Algorithms, Machine Learning, Business Analytics, Python Programming

Sri Chaitanya Junior College, Hyderabad – *Intermediate* | *96.8%* Apr 2021 – May 2022

Disney Land High School, Warangal – *Matriculation* | *100%* Apr 2019 – Mar 2020

INTERNSHIP

Programmer Analyst Trainee – *Cognizant Technology Solutions* Jan 2026 – Present

- Worked with structured datasets and reporting workflows — developing strong data documentation, validation, and analysis habits using Python and SQL across real enterprise data pipelines in a fast-paced delivery environment.
- Collaborated with cross-functional teams in an Agile sprint-based environment — contributing to data-driven decision-making discussions, system documentation, and iterative reporting cycles evaluated by senior engineers and Subject Matter Experts.

SKILLS

Visualization:	Tableau Desktop, Tableau Prep, Power BI (familiar), Matplotlib, Seaborn, Excel Charts & Pivot Tables, interactive dashboards
Data Analysis:	EDA, Predictive Analysis, Statistical Analysis, Data Cleaning, Data Preprocessing, Missing Value Treatment, Feature Engineering
Languages:	Python (primary — Pandas, NumPy, Scikit-learn), SQL (5-Star HackerRank), Java, Kotlin
Tools & Platforms:	Microsoft Excel, Google Sheets, Geoapify APIs, REST APIs, GIT/GitHub, Jupyter Notebook, Postman
ML & Clustering:	K-Means, Hierarchical Clustering, Linear Regression, KNN, SVM, Decision Trees, Ensemble Methods, Scikit-learn

PROJECTS

Traffic Analysis Dashboard – Real-Time Data Analytics *Tableau Desktop, Google Sheets, Geoapify APIs, Python* | *Jan–Feb 2025*

- Designed an automated and dynamic Tableau dashboard integrating real-time data from Google Sheets and Geoapify APIs — visualizing key traffic metrics, route efficiency, and commercial locations, improving navigation insights by **80%**.
- Automated data extraction and transformation from multiple APIs — ensuring seamless, real-time dashboard updates and reducing manual data effort by **80%** through Python-based preprocessing and structured data pipelines.
- Enabled accurate geospatial analysis and data-driven decision-making — delivering actionable business insights through interactive visualizations contributing to a **15% increase in operational efficiency**.

Amazon Prime Data Analysis Dashboard *Tableau Desktop, Tableau Prep* | *Nov–Dec 2024*

- Performed comprehensive data cleaning and transformation on Amazon Prime content data using Tableau Prep — handling missing values, removing duplicates, and standardizing fields to ensure a **high-quality, analysis-ready dataset** before visualization.
- Built an automated, interactive Tableau dashboard analyzing content trends across **518 categories** — showcasing movie vs. TV show split (**80.82% movies, 19.18% TV shows**), top-rated genres, and content distribution for strategic business decision-making.
- Implemented real-time filtering and dynamic visual reporting — improving content discovery and audience engagement insights, enabling stakeholders to make **data-driven content strategy decisions** through intuitive, self-updating dashboard views.

Customer Segmentation for Retail Store Analysis *Python, Pandas, Matplotlib, Seaborn, Scikit-learn* | *Jun 2024*

- Executed end-to-end data cleaning and preparation on customer retail data — addressing **100% missing values**, normalizing features, and standardizing inputs to enhance clustering reliability and ensure analysis-ready data quality.
- Applied K-Means and Hierarchical clustering algorithms to segment customers into distinct groups — identifying clear spending behaviors and income patterns across segments, delivering **actionable business insights** for targeted marketing and inventory strategies.
- Enhanced customer insights visualization using Matplotlib and Seaborn — producing clear, interpretable cluster plots and comparison charts that improved business decision-making interpretability by **40%** for non-technical stakeholders.

CERTIFICATIONS & ACHIEVEMENTS

Data Visualization with Tableau – Coursera (Nov 2024) | **Introduction to Machine Learning** – NPTEL (Oct 2024) | **Python, Java & SQL** – HackerRank (Jan 2025)

Achieved **5-Star rating in SQL** on HackerRank (Feb 2025) | Active Open Source Contributor & Hackathon Participant
