EDUCATION

Lovely Professional University, Phagwara, Punjab – *B.Tech, Computer Science & Engineering* | *CGPA: 8.1* Aug 2022 – Present

Relevant Coursework: Natural Language Processing, Machine Learning, Deep Learning, Transformers & LLMs, Information Retrieval, Data Structures & Algorithms, Statistics & Probability

Sri Chaitanya Junior College, Hyderabad – *Intermediate* | *96.8%* Apr 2021 – May 2022

INTERNSHIP

Programmer Analyst Trainee – *Cognizant Technology Solutions (GenC Program)* Jan 2026 – Present

- Operated in a **fast-paced, sprint-based engineering environment** — delivering working software weekly with real deadlines, iterating rapidly on feedback from senior engineers and BU subject matter experts, closely mirroring startup execution speed.
- Built end-to-end **API integration and data validation pipelines** using REST Assured — covering full HTTP method testing, JSON/XML schema validation, authentication flows, and structured error handling — developing a rigorous mindset for testing and hardening NLP system outputs.
- Collaborated across engineering, QA, and analytics teams on **system design, service orchestration**, and iterative feature delivery — building strong cross-functional communication and documentation habits essential for fast-moving product teams.

SKILLS

NLP & LLMs:	LLM-based pipelines, RAG, document understanding, semantic search, Transformers, fine-tuning (familiar), NLP evaluation frameworks
LLM Tooling:	Groq API, LangChain, LlamaIndex, Prompt Engineering (Zero-shot, Few-shot, CoT), agentic workflows, LLM agents
ML & Modelling:	Scikit-learn, TensorFlow (familiar), PyTorch (familiar), Naive Bayes, SVM, Ensemble Methods, Classification, Regression
Languages:	Python (primary), SQL, Java, Kotlin
Infra & Deploy:	Hugging Face Spaces (deployed), Gradio, Docker, GIT/GitHub, REST APIs, NumPy, Pandas, Matplotlib, Tableau

PROJECTS

DataGroq – LLM-Powered Document Understanding & Query Engine *[Live]* *Groq API, LangChain, Python, NLP, RAG, Gradio, HuggingFace* | *Sept 2025*

- Built and deployed a **natural language query engine** over **200+ documents and datasets** using Groq LLM API — enabling intuitive conversational access to structured and unstructured data, directly aligned with WisdomAI's mission of democratizing data insights for end users.
- Engineered **end-to-end NLP pipelines** for document understanding — tokenization, lemmatization, semantic classification, keyword extraction, and context synthesis — integrating with LLM inference to deliver accurate, structured responses with **30% improved analytical accuracy**.
- Designed and implemented an **agentic query processing workflow** with safe code execution, input guardrails, and EDA-driven metric extraction — reducing manual analysis time by **70%** and validating output quality through structured evaluation of LLM response correctness and relevance.

Sentiment Strategy Comparison – NLP Evaluation Framework *Python, TextBlob, Naive Bayes, Transformers, Prompt Engineering, Gradio* | *Dec 2024*

- Designed a rigorous **NLP model evaluation framework** benchmarking **6 strategies** — TextBlob, Naive Bayes, Zero-shot, One-shot, Few-shot, and Chain-of-Thought prompting — on **1,000+ labeled product reviews**, systematically measuring accuracy, latency, and interpretability tradeoffs.
- Built a structured **LLM evaluation pipeline** probing reasoning quality across prompt strategies — identifying failure modes in generative approaches (avg. **41% accuracy**) vs classical ML (**96.8% accuracy**) and generating documented insights on when and why each strategy succeeds or fails.
- Deployed an interactive **model experimentation interface** on Gradio for real-time strategy comparison — visualizing performance via radar charts and bar graphs, enabling rapid iteration on prompt design and direct evaluation of NLP output quality aligned with query processing requirements.

Traffic Analysis Dashboard – Metric Extraction & Analytics Pipeline *Python, Geoapify APIs, Google Sheets API, Tableau* | *Jan–Feb 2025*

- Built an **automated metric extraction and analytics pipeline** integrating multiple REST APIs (Geoapify, Google Sheets) — extracting, transforming, and loading real-time traffic data into a dynamic Tableau dashboard, **reducing manual effort by 80%** and delivering insights with zero manual intervention.
- Applied Python-based **data preprocessing and semantic standardization** across heterogeneous API sources — implementing consistency validation and structured error handling to ensure reliable metric extraction contributing to a **15% gain in operational efficiency**.
- Delivered intuitive, self-updating **geospatial analytics** enabling business users to access and interpret complex data insights naturally — demonstrating the core WisdomAI value of making data accessible to everyone through well-designed analytical tooling.

CERTIFICATIONS & ACHIEVEMENTS

Introduction to Machine Learning – NPTEL (Oct 2024) | **Data Visualization with Tableau** – Coursera (Nov 2024) | **Python, Java & SQL** – HackerRank (Jan 2025)

Achieved **5-Star rating in SQL** on HackerRank (Feb 2025) | Active Open Source Contributor & Hackathon Participant
