EDUCATION

Lovely Professional University, Phagwara, Punjab – *B.Tech, Computer Science & Engineering* | *CGPA: 8.1* Aug 2022 – Present

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Database Management Systems, Software Testing, Operating Systems

Sri Chaitanya Junior College, Hyderabad – *Intermediate* | *96.8%* Apr 2021 – May 2022

INTERNSHIP

Programmer Analyst Trainee – *Cognizant Technology Solutions (GenC Program)* Jan 2026 – Present

- Undergoing an intensive **65-day industry-aligned training program** covering Core Java, SQL, Selenium WebDriver, TestNG, Page Object Model, BDD Cucumber, Maven, GIT, Jenkins, REST Assured API Automation, and Docker — directly mapped to **enterprise QA automation workflows**.
- Designed and delivered an **end-to-end Selenium TestNG automation project** implementing **POM architecture**, dynamic XPath, multi-browser support, data-driven testing, screenshot capture, and **ExtentReports-based HTML reporting** on a real e-commerce platform.
- Evaluated on Interim and Final technical assessments by **BU Subject Matter Experts**; completed Code Challenges, ICTs, and integrated project deliverables covering **functional testing and full automation** across multiple sprints in **Agile methodology**.

SKILLS

Languages:	Java (primary — automation & backend), Python, Kotlin, SQL
Automation Tools:	Selenium WebDriver 4.x, TestNG, Page Object Model (POM), Dynamic XPath, CSS Selectors, ExtentReports, Apache POI
DevOps & CI/CD:	Maven, GIT / GitHub, Jenkins, Docker, BDD Cucumber, REST Assured, Postman, JIRA
ML / AI & Data:	Scikit-learn, NLP, Groq API, Prompt Engineering (Zero-shot, Few-shot, CoT), NumPy, Pandas, Tableau
Soft Skills:	Problem-Solving, Communication, Teamwork, Documentation & Presentations, Adaptability, Ownership

PROJECTS

Flipkart Mobile Automation – E2E Test Automation Suite *Selenium 4, TestNG, Java, POM, ExtentReports* | *Feb 2026*

- Built a **production-grade end-to-end** Selenium TestNG automation framework automating the complete Flipkart mobile search, filter, sort, and price validation flow using **Page Object Model** across 3 page classes with **zero hardcoded XPaths** — all locators managed via an object.properties file read through a custom ObjectReader utility.
- Implemented **multi-browser support** (Chrome, Firefox, Edge) via runtime Scanner input, **WebDriverWait-based synchronization**, Select-class dropdown handling, popup management with try-catch, and **LinkedHashMap-based top-5 mobile data extraction** with Assert-based price validation below Rs.30,000.
- Integrated **ExtentReports** with pass/fail/info logging, **TakesScreenshot-based PNG capture** on test failure, and a **4-test sequential TestNG suite** using priority and dependsOnMethods — delivering a complete HTML report covering search, filter, sort, and price validation scenarios.

DataGroq – Smart Document Analysis Assistant *Groq API, Python, NLP, ML, Data Visualization* | *Sept 2025*

- Built an **end-to-end AI-powered document analysis pipeline** using Groq API enabling conversational interaction with **200+ documents**; integrated NLP workflows including tokenization, stopword removal, lemmatization, document classification, and keyword extraction — improving **analytical accuracy by 30%**.
- Enabled **natural language Q&A** with safe Python code execution automating document insights and **reducing manual analysis time by 70%**; delivered interactive EDA charts, correlation heatmaps, and ML model performance plots demonstrating full **prototype-to-demo ownership**.
- Implemented **multi-format document support** with structured data extraction, enabling extraction of actionable business insights and presenting findings through a **live interactive interface** — showcasing end-to-end pipeline design on real-world unstructured data.

Traffic Analysis Dashboard *Tableau, Google Sheets, Geoapify APIs, Python* | *Jan–Feb 2025*

- Designed an automated, dynamic **Tableau dashboard** integrating real-time data from Google Sheets and Geoapify APIs, visualizing key traffic metrics, route efficiency, and commercial location data — **reducing manual data effort by 80%** and **improving navigation insights by 80%**.
- Automated **multi-API data extraction and transformation pipeline** ensuring seamless, real-time dashboard updates with zero manual intervention; enabled accurate **geospatial analysis** and data-driven decision-making contributing to a **15% increase in operational efficiency**.
- Applied **Python-based preprocessing and data cleaning** to standardize inputs from heterogeneous API sources, ensuring **data consistency and reliability** across all dashboard visualizations — demonstrating end-to-end data engineering from raw API response to **business-ready insight**.

CERTIFICATIONS & ACHIEVEMENTS

Introduction to Machine Learning – NPTEL (Oct 2024) | **Data Visualization with Tableau** – Coursera (Nov 2024) | **Python, Java & SQL** – HackerRank (Jan 2025)

Achieved **5-Star rating in SQL** on HackerRank (Feb 2025) | Active **Open Source Contributor** & **Hackathon Participant**
