EDUCATION

Lovely Professional University, Phagwara, Punjab — Aug 2022 – Present

Bachelor of Technology – Computer Science & Engineering | *CGPA: 8.02*

Relevant Coursework: Machine Learning, Deep Learning, NLP & Transformers, Data Structures & Algorithms, Database Management Systems

Sri Chaitanya Junior College, Hyderabad – *Intermediate* | *Percentage: 96.8%* — Apr 2021 – May 2022

SKILLS SUMMARY

Languages:	Python (primary — data & ML workflows), Java, Kotlin, SQL
ML Frameworks:	Scikit-learn, TensorFlow / Keras, PyTorch, Neural Networks, Transformers, Classification, Regression
Gen AI Tools:	Groq API, LangChain, LlamaIndex, Prompt Engineering (Zero-shot, Few-shot, Chain-of-Thought)
Data & Viz:	NumPy, Pandas, Matplotlib, Tableau, EDA, Predictive Analysis, Data Preprocessing, Geoapify APIs
Soft Skills:	Problem-Solving, Communication, Teamwork, Adaptability, Documentation & Presentations, Ownership

TRAINING

Data Science and Machine Learning using Python – *Cipher Schools* — Jun 2024 – Jul 2024

- Performed Exploratory Data Analysis using NumPy and Pandas, achieving a 20% reduction in data preprocessing time across structured datasets.
- Developed, trained, and evaluated ML models — Linear Regression, KNN, SVM, Decision Trees, K-Means, and Ensemble Methods using Scikit-learn, achieving an average accuracy improvement of 15% across benchmarks.

PROJECTS

DataGroq – Smart Document Analysis Assistant — *Groq API, Python, NLP, ML, Data Visualization | Sept 2025*

- Built an end-to-end AI-powered ML pipeline using Groq API enabling conversational interaction with 200+ documents; integrated NLP workflows — tokenization, stopword removal, lemmatization, document classification, and keyword extraction — improving analytical accuracy by 30%.
- Enabled natural language Q&A with safe Python code execution, automating document insights and reducing manual analysis time by 70%; delivered findings through interactive EDA charts, correlation heatmaps, and ML model performance plots demonstrating full prototype-to-demo ownership.

Sentiment Strategy Comparison Tool — *Python, TextBlob, Naive Bayes, Prompt Engineering, Gradio | Dec 2024*

- Designed and evaluated an ML pipeline comparing 6 sentiment analysis strategies — TextBlob, Naive Bayes, Zero-shot, One-shot, Few-shot, and Chain-of-Thought prompting — on 1,000+ labeled product reviews, achieving 96.8% accuracy with the Naive Bayes model.
- Applied Generative AI prompt engineering (CoT, few-shot) aligned with enterprise GenAI use cases; visualized results via radar charts and bar graphs using Matplotlib and deployed a Gradio prototype for live demos and team presentations.

Traffic Analysis Dashboard — *Tableau, Google Sheets, Geoapify APIs, Python | Jan – Feb 2025*

- Designed an automated, dynamic Tableau dashboard integrating real-time data from Google Sheets and Geoapify APIs, reducing manual data effort by 80% and improving navigation insights by 80% across monitored routes.
- Automated multi-API data extraction and transformation pipeline ensuring seamless updates; enabled geospatial analysis and data-driven decision-making, contributing to a 15% increase in operational efficiency.

CERTIFICATIONS & ACHIEVEMENTS

Data Visualization with Tableau – Coursera (Nov 2024) | **Introduction to Machine Learning** – NPTEL (Oct 2024) | **Java, Python & SQL** – HackerRank (Jan 2025)

Achieved **5-Star rating in SQL** on HackerRank (Feb 2025) | Active Open Source Contributor and Hackathon Participant across national-level platforms
